CICK OIL AND INDUSTRIAL SERVICES LIMITED

Company Profile

About Us

CICK Oil and Industrial Services Limited is a leading provider of Engineering, Procurement, Construction, Installation, and Commissioning (EPCIC) services, Well Intervention, and Marine Logistics Support Services. With a team of experienced professionals and state-of-the-art technology, we deliver innovative solutions to meet the needs of the oil and gas industry.

**CICK OIL AND
INDUSTRIAL
SERVICES LIMITED**

Our services include project management, engineering design, construction, maintenance, and logistics support for offshore and onshore operations.

We are committed to providing high-quality, cost-effective solutions to our clients, ensuring project success and exceeding expectations. Contact us today to learn more about how we can support your project needs.

Core Values

INTEGRITY

Upholding the highest ethical standards in all our interactions and operations.

INNOVATION

Embracing new technologies and methods to provide effective solutions.

SUSTAINABILITY

Promoting environmentally friendly practices and sustainable development.

EXCELLENCE

Committing to superior quality and performance in every project.

SAFETY

Prioritizing the health and safety of our employees, clients, and communities.

MANPOWER DEVELOPMENT & SUPPLY

Turnkey Asset Management and Re-Development Services.
Non Operated Ventures (NOV)
Support Services.

Our Services

Engineering & Construction Procurement & Supply Chain Maintenance & Asset Integrity Drilling Support Services.

Engineering & Construction Services Civil, mechanical, and electrical Fabrication & installation of pipelines and structures Plant modifications and upgrades Equipment installation & commissioning Engineering services-concept design, feasibility studies, FEED and DEED Project Management.

💧 **Procurement & Supply Chain Management**

💧 **Drilling Support Services**

💧 **Solids Control Services**

💧 **Drilling Fluid Services**

💧 **Waste Management Services**

Procurement & Supply Chain Management

Sourcing and procurement of critical materials and equipment
End-to-end project logistics Freight forwarding, import and customs
brokerage services Marine equipment leasing Rig movement and
regulatory agencies interface services

Drilling Support Services

- Solids Control Services
- Drilling Fluid Services
- Waste Management
- Mud Logging Services
- Logistics for heavy duty equipment movement.

Solids Control Services

- Our inventory of Solids Control equipment includes, but not limited to:
- Dryer WSM-01
- Centrifuge CD518FH STD
- Centrifuge CD414 ELECT STD
- R -Valves
- Mono Pump MN -80
- Mono Pump MN -120
- 100HP Vacuum
- RVT
- Feed/Discharge Conveyor
- Compressor 1000CFM
- Fully Equipped Maintenance Workshop.

Drilling Fluid Services

10 Drilling Fluids Management 2,000 Square Meters
Warehouse 1,000 Square Meters of Open Area for Storage of Chemicals Liquid
Mud Plant and Brine Plant (18,500 Bbl Total Capacity) 2 x 300 Bbl Mixing Tanks 2
Mixing Pumps (8" x 6" centrifugal pumps) Fully Equipped Mud laboratory.

Waste Management Services

- 1000 Sealed Leak Proof Skips
- Mud Dewatering Unit
- Mud Tankers
- 500BBLs Holding Tanks
- Excavators
- Flat Bed Trucks
- Vacuum Trucks
- Thermal Desorption Unit

PIPELINE CONSTRUCTION SERVICES

Our Pipeline Construction Services are designed to deliver safe, efficient, and regulatory-compliant transportation systems for oil, gas, water, and industrial fluids. We provide end-to-end pipeline solutions covering engineering design, procurement, construction, testing, commissioning, and maintenance support. With a strong focus on safety, quality assurance, and environmental stewardship, our pipeline projects are executed in accordance with industry standards and best practices to ensure operational reliability and long-term asset integrity.

Scope of Services

Route Survey & Feasibility Studies

Comprehensive route assessments including topographical surveys, soil investigation, environmental impact assessments, and right-of-way evaluations.

Engineering & Design

- ★ Conceptual and detailed engineering design
- ★ Hydraulic and stress analysis
- ★ Material selection and specification
- ★ Corrosion protection design

Procurement & Logistics

- ★ Supply of pipes, fittings, valves, and coatings
- ★ Vendor inspection and quality control
- ★ Logistics coordination and material handling

Pipeline Installation

- ★ Trenching and backfilling
- ★ Pipe stringing and alignment
- ★ Welding and joint coating
- ★ Non-destructive testing (NDT)
- ★ Lowering-in operations

Testing & Commissioning

- ★ Hydrostatic pressure testing
- ★ Leak detection
- ★ Pigging operations
- ★ Final inspection and commissioning

Safety & Compliance

All pipeline construction activities are carried out in strict compliance with national and international standards. Our HSE management system ensures:

- ★ Zero harm to personnel
- ★ Environmental protection
- ★ Risk mitigation and hazard control
- ★ Compliance with regulatory authorities

Value Proposition

- ★ Timely project delivery
- ★ High-quality workmanship
- ★ Advanced construction equipment
- ★ Experienced engineering and field teams
- ★ Cost-effective and sustainable solutions

WELLHEAD SERVICES

Our Wellhead Services division provides specialized technical solutions for the installation, maintenance, and integrity management of wellhead systems in both onshore and offshore environments.

We ensure that wellheads are installed and maintained to operate safely under high-pressure and high-temperature conditions, thereby protecting production assets and ensuring operational continuity.

Wellhead Installation

- Surface and subsea wellhead installation
- Casing head and tubing head installation
- Christmas tree installation and testing

Maintenance & Repairs

- Seal replacement
- Valve repair and replacement
- Component refurbishment
- Emergency response services

Operational Excellence

We utilize certified technicians, precision equipment, and industry-approved procedures to ensure:

- Safe well control
- Extended equipment lifespan
- Reduced downtime
- Compliance with oilfield safety regulations

Pressure Control & Testing

- Pressure testing of wellhead assemblies
- Blowout preventer (BOP) support services
- Leak detection and integrity testing

Integrity Management

- Inspection and monitoring
- Corrosion assessment
- Preventive maintenance programs

Strategic Advantage

Our wellhead services help operators:

- Maintain production efficiency
- Reduce operational risks
- Ensure well integrity
- Minimize non-productive time (NPT)

INSTRUMENTATION AND CALIBRATION SERVICES

Instrumentation and Calibration Services are critical to maintaining accurate measurement, operational control, and process efficiency in industrial facilities. We provide precision calibration, installation, and maintenance services for a wide range of instrumentation systems. Our services support oil & gas facilities, power plants, manufacturing plants, and process industries.

Instrument Installation

- Pressure transmitters
- Temperature sensors (RTDs, thermocouples)
- Flow meters
- Level transmitters
- Control valves

Calibration Services

- Pressure calibration
- Temperature calibration
- Flow calibration
- Electrical instrument calibration
- On-site and laboratory calibration

Loop Testing & Commissioning

- Instrument loop checks
- Control system verification
- Signal integrity testing
- Functional performance testing

Preventive Maintenance

- Routine inspection
- Fault diagnosis
- Equipment troubleshooting
- Replacement and upgrades

Quality & Accuracy Assurance

Our calibration processes are performed using certified reference equipment to ensure:

- Measurement accuracy
- Compliance with industry standards
- Process reliability
- Reduced operational errors

Benefits to Clients

- Improved operational efficiency
- Reduced equipment failure
- Enhanced safety compliance
- Accurate data for decision-making
- Increased plant reliability
